# SMALL-PIECE ROTARY ACCUMULATOR

## BENEFITS

The Braun Small-Piece Rotary Accumulator (SPRA) operates as an integral part of a primary folder or folder/cross-folder. Mounted above the bypass table across the back of either the primary folder or folder/cross-folder, the Rotary Accumulator utilizes the folder's infeed conveyor to move goods from the flatwork ironer discharge.

The SPRA is ideal for draping and stacking small-piece ironed cotton, polyester/cotton, or spun polyester flatwork.

The microprocessor automatically measures each item to provide accurate accumulating/draping of various sized items from 12" X 12" to 28" W X 36" L.

The SPRA operates with flatwork ironers operating up to 150 feet per minute, and is available in 4 or 5 lane configurations.

The FSSPRA5 free standing accumulator is available in a 5 lane configuration.

# NAPKIN ACCUMULATOR (Design for synthetic fabrics such as spun-poly)

## BENEFITS

The Braun Napkin Accumulator (FSNA) is a free standing, caster-mounted accumulator for use behind almost any flatwork ironer.

It accumulates small flatwork goods, such as table napkins, at the rear on dual storage rods in each lane. The Accumulator has been configured to take the napkins off the ironer and drape them in half over the storage rods in stacks of up to 25.

The FSNA4, operating with a primary folder or folder/crossfolder, is 120 inches wide and has a four-lane configuration. It is capable of accumulating pieces as large as 24" x 24". It is also available in (optional) 130 inch working width.

This accumulator is equipped with complete on-board diagnostics for trouble-free operation.
